

TEST QA

1. Design the functional test for the following screen, detailing the test cases and a dataset for each case.

The image shows a mobile app screen for creating a vCard. At the top, the status bar displays the time 13:03, signal strength, Wi-Fi, and battery. The app header has a back arrow, the title 'vCard', and a 'Create' button with a plus icon. A light orange banner contains an information icon and the text 'Fill at least one field to create your code'. Below this are four input fields: 'First Name' (placeholder 'e.g John'), 'Last Name' (placeholder 'e.g Doe'), 'Phone number' (with a flag icon, '+44', and placeholder 'e.g 12345678'), and 'Email' (placeholder 'e.g. johndoe@example.com'). A thick black horizontal bar is at the bottom.

13:03

< vCard Create

Fill at least one field to create your code

First Name Last Name

e.g John e.g Doe

Phone number

+44 | e.g 12345678

Email

e.g. johndoe@example.com

Test cases (using Gherkin)

Feature: vCard Functionality

Scenario: Create a vCard (Happy Path)

Given the user is on the vCard screen

And the user is using <platform>

When the user introduce <firstName> in the "First Name" Field

And the user introduce <lastName> in the "Last Name" Field

And the user introduce <phoneNumber> in the "Phone Number" Field

And the user introduce <email> in the "Email" Field

Then the placeholder text are not visible anymore

And the "Fill at least one field to create your code" toast correctly disappears

Examples:

platform	Android	
firstName	"Alejandro	
lastName	"Molina"	
phoneNumber	"634 56 67 96"	
email	" email@email.com "	

Feature: vCard Functionality

Scenario: Check that the toast does not disappear when a missing field is not filled.

Given the user is on the vCard screen

And the user is using <platform>

When the user introduce <firstName> in the "First Name" Field

And the user introduce <lastName> in the "Last Name" Field

And the user introduce <email> in the "Email" Field

Then the placeholder text are not visible anymore for the filled fields

And the "Fill at least one field to create your code" toast is still visible

Examples:

platform	iOS	
firstName	"Bernabé"	
lastName	"Lara"	
phoneNumber	"634 56 67 96 "	
email	" email@email.com "	

Scenario: Check that the country flag displays the correct country

Given the user is on the vCard screen

And the user is using <platform>

When the user clicks on the country flag icon

And the user selects <country>

Then the prefix <prefix> is displayed

And the number matches with the selected flag

Examples:

platform	iOS	Android	
country	"UK"	"ES"	
prefix	"+ 44"	"+ 34"	

2. Report the full details of the incident that occurs when validating this form.

DEFECT REPORT

Platform: Web

Environment: integration

Severity: high

Defect explanation: The web input seems to not be getting the values correctly. Both values (First name and last name), are correctly placed in their fields. Also, the css elements like '' or '' are being displayed in the warning message. They shouldn't be visible.

How to reproduce: Introduce the First Name and the Last Name in their corresponding fields and click on "accept".

Evidences:

The first name field is required.The last name field is required.The full name field is required.

Personal Details

First Name* 3232 ⓘ ⓘ

Last Name* 232323232 ⓘ ⓘ
